

Renderer

Renderer

ObjectHorizontalRenderer

```
classDiagram
    class Renderer1[Renderer]
    class Renderer2[Renderer]
    class ObjectHorizontalRenderer
    ObjectHorizontalRenderer --|> Renderer1
    ObjectHorizontalRenderer --|> Renderer2
```

The diagram illustrates a class hierarchy where a single base class, ObjectHorizontalRenderer, is inherited by two distinct classes, both labeled as Renderer. The inheritance is represented by a horizontal line with a vertical stem in the center, and two arrows pointing upwards to the respective Renderer boxes.
